INSTALLATION INSTRUCTIONS

The filter must be installed in compliance with all regulations governing the installation and use of this product.
 Disconnect electrical power and close water supply valve before proceeding.
 Flow indicator (arrow) on filter should point in the same direction as the water flow.
 After installing new filter, open water supply valve and check for leaks. Reconnect electrical power supply. Flush system with 5 gallons of water (approximately 12 minutes for fountains or 4 minutes for bottle filling stations) to effectively purge any air from the cartridge and remove loose filter media.
 Filter should be replaced every 3000 gallons (11,356 liters), or approximately 1 year after installation.
 NOTE: Only use this system with public water supplies.
