

Halsey Taylor Owners Manual

MODEL 4540 FOUNTAIN

INSTALLATION INSTRUCTIONS

1. This fountain is to be mounted on a smooth, flat, finished wall surface, with adequate support structure.
 2. Establish rim height fountain is to be mounted at.
 3. Refer to rough-in for plumbing.
 4. Locate and install trap (not included).
 5. Install shut-off valve (not included) on building water supply.
 6. Secure fountain using 1/4" (6mm) lag screws or bolts (not included).
- CAUTION:** This fountain is rated for inlet water pressure of 20-90 psi. Should the inlet water supply exceed 90 psi, a pressure reducing regulator should be used.
7. Connect fountain to building supply line by running a water line between the shut-off valve and fountain.
 8. Turn on water supply and check all connections for leaks.
 9. Adjust bubbler stream height. (See instructions below)

TROUBLE SHOOTING & MAINTENANCE

PROJECTOR: If mineral deposits build up in the orifice, they can be removed by using a round file or small diameter wire.

CAUTION: Care must be taken not to damage orifice assembly.

STREAM REGULATOR: Stream height is factory set at 45-50 psi. If supply pressure varies greatly from this, remove the cap from the bubbler assembly/valve regulator and adjust the screw on the regulator. Clockwise adjustment will raise stream height and counterclockwise will lower stream height. A stream height of 1-1/2" (38mm) is recommended. (See Fig. 1)
