IMPORTANT! INSTALLER PLEASE NOTE:

The grounding of electrical equipment such as telephone, computers, etc., to water lines is a common procedure. This grounding may be in the building or may occur away from the building. This grounding can cause electrical feedback into a water cooler, creating an electrolysis which causes a metallic taste or causes an increase in the metal content of the water. This condition is avoidable by using the proper materials as indicated below. The drain fittings which are provided by the installer should also be plastic to electrically isolate the cooler from the building plumbing system.

OPERATION OF QUICK CONNECT FITTINGS Simply push in Tube is secured Push in collet to tube to attach in position release tube Pushing tube in before pulling it out helps to release tube 1/4" O.D. tube 3/8" O.D. Tube connect Building water water inlet to cold water supply inlet cooler Servicé stop NOTE: Waterflow (Not furnished) direction
