INSTALLATION INSTRUCTIONS

The filter must be installed in compliance with all regulations governing the installation and use of this product.
Disconnect electrical power and close water supply valve before proceeding.
Install the system vertically with the cartridges facing downward.
After installing new filter, open water supply valve and check for leaks. Reconnect electrical power supply.
Flush system sufficiently (approximately 5 minutes) to effectively purge any air from the cartridge and remove loose filter media.
Filter should be replaced every 35,000 gallons (132,000 liters), or approximately 6 months to 1 year after installation.
NOTE: Only use this system with public water supplies.
